ISO 14001 Environmental Policy

Trust Systems is a managed service provider delivering Cloud, Network, Digital and Security solutions to private and public organisations. We recognise that our activities have an impact on the environment in terms of the use of raw materials, emissions to air and water, and waste generation. We are committed to minimise our impact and will take steps where reasonably practical.

We will:

- Consider environmental impact at all stages of the business from design to end of life.
- Identify, reduce and dispose of waste arising from our business operations to ensure we minimise the impact to the environment including; prevention of pollution of land, air and water ensuring consideration is given to the waste hierarchy.
- Promote recycling both internally and externally with our customers, suppliers and visitors to our locations.
- Manage and consider our supply chain to select suppliers who adhere to an environmental policy, and encourage contractors and their subcontractors to consider environmental impacts when making purchases.
- Avoid unnecessary use of hazardous materials and products, seek substitutions where feasible and take all reasonable steps to protect human health and the environment when such materials must be used, stored and disposed of.
- Comply with all relevant environmental laws and regulations.
- Provide relevant training to staff and contractors when appropriate to raise awareness of environmental aspects and issues.
- Ensure that our team at Trust Systems are aware of our Environmental Policy and their role and responsibilities.

We believe that the effective implementation of our environmental management system is essential for us to meet our commitment.

We continually evaluate and review our environmental policy and objectives as necessary and at a minimum annually to maintain an environmental management system that reflects our business requirements to reduce our impact on the environment.

Our Environmental Management System meets the criteria of ISO 14001 Environmental Management Systems standard.
