

# Introducing Trust

## Cloud, Network & Infrastructure Solution & Services

---

# Executive Summary

## Why organisations are rethinking cloud

Many organisations are facing:

- ✓ Rising cloud costs
- ✓ Increasing complexity
- ✓ Vendor dependency
- ✓ Data sovereignty concerns
- ✓ Growing compliance requirements

Trust Cloud provides a secure, UK-hosted cloud platform designed to restore control, simplify operations, and provide predictable costs.

---

*In this guide you'll learn:*

- ✓ *The key principles behind Trust Cloud*
- ✓ *How organisations can improve control and resilience*
- ✓ *Where managed cloud services fit into future growth plans*
- ✓ *Why traditional cloud models are being challenged*

# Powering Organisations with Cloud, Network & Infrastructure Services

In partnership with Crown Hosting and Ark Data Centres, we deliver secure, scalable, and compliant cloud infrastructure for organisations across both public and private sectors. Our services are underpinned by a best-in-class technology ecosystem, including Zadara for cloud platforms, Assurestor for backup and cyber resilience, Cirrus Data for intelligent data migration, and Technimove for physical relocation services.

We bring these capabilities together into a single, seamless solution. Our integrated approach to cloud, migration, and

infrastructure simplifies the complexity supporting digital transformation with confidence, resilience, and efficiency.

## Key Solution and Services

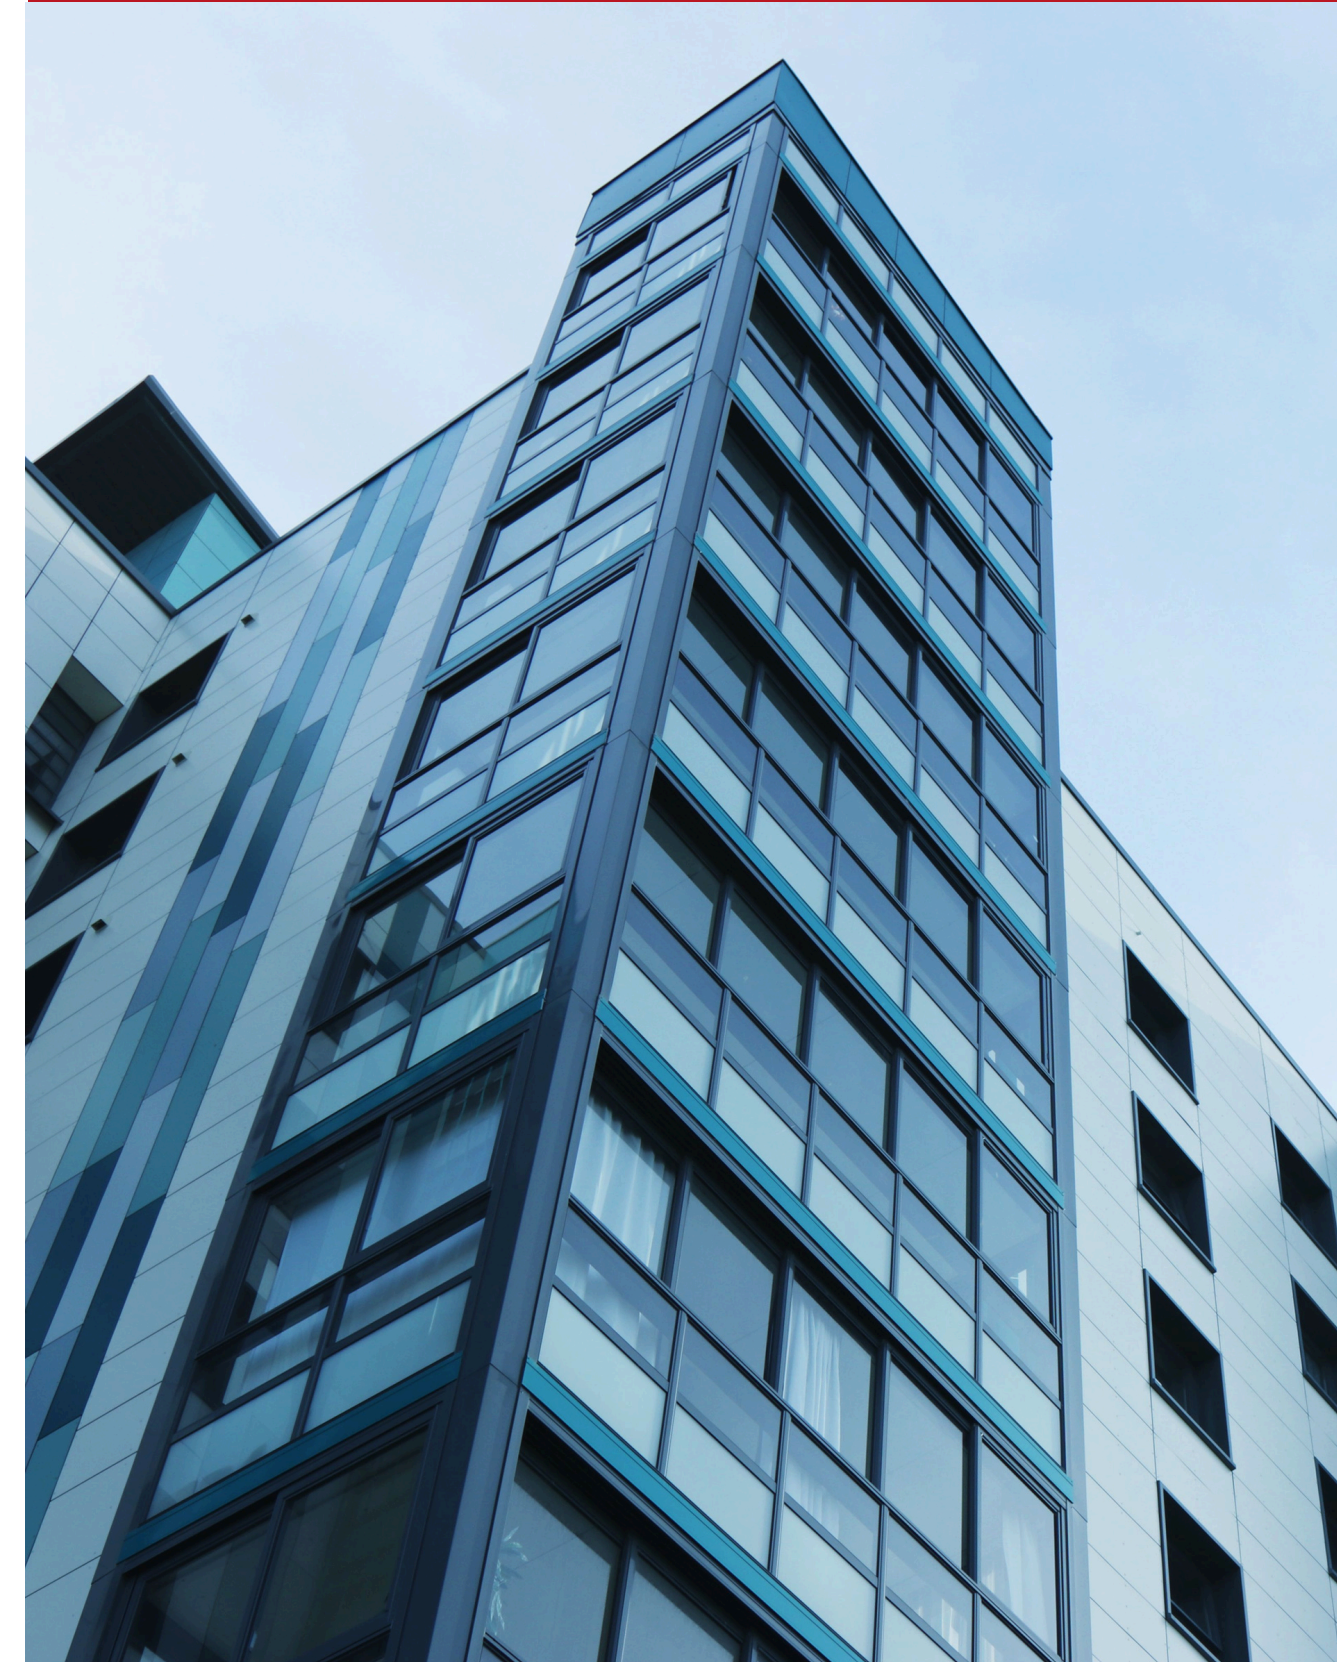

- Migration Services: Infrastructure
- Migration Services: Data
- Trust Cloud - an alternative Cloud solution
- Network & Infrastructure
- Back-Up
- Managed Services & Support
- Professional Services

# Migration Services: Infrastructure

Our Migration Services encompass both physical and logical transitions, ensuring seamless relocation or transformation of IT systems and data.

This includes the careful planning and execution of hardware moves, as well as the reconfiguration or virtualisation of systems to align with evolving business needs.

-  Physical Migration
-  Logical Migration

# Migration Services: Data

We provide automated data migration that eliminates disruption, reduces risk, and accelerates transformation.

We partner with leading data mobility technologies to deliver seamless, secure, and highly automated migration services across on-premise, cloud, and hybrid environments.

Our approach ensures that your data moves without downtime and complexity. Ultimately, ensuring we do not compromise performance, enabling you to modernise infrastructure with confidence.

## ***Move Data with Confidence, Speed, and Control***

- ✓ *Near-zero downtime with live data migration*
- ✓ *Fully automated workflows reduce risk and effort*
- ✓ *Move data anywhere across cloud, on-prem, and hybrid*
- ✓ *Secure by design with encryption and rollback options*
- ✓ *No performance impact during migration*
- ✓ *Minimise complexity and eliminate manual processes*

***We make data migration a predictable, low-risk, process, supporting your journey to a more modern, agile, and resilient IT environment.***

# Trust Cloud

## An alternative cloud solution

### Redefining Cloud: Sovereignty, Simplicity, and Trust: Your Cloud, Your Control

Trust Cloud is our cloud platform, designed to help public sector organisations modernise infrastructure with confidence.

Hosted within UK sovereign data centres and aligned to government frameworks, Trust Cloud provides a secure, scalable foundation for managing applications, data and workloads with predictable costs.

---

Powered by  
**zadara**

*Cloud environments are becoming increasingly difficult to manage, with instability, rising complexity, and unpredictable costs creating new challenges for organisations of all sizes. At the same time, industry disruption has revealed how dependent many businesses have become on a limited number of suppliers, making control, resilience, and data independence more important than ever.*

*Trust Cloud provides:*

- Predictable, transparent economics that help organisations budget confidently and avoid unexpected cloud spend*
- Secure, compliant infrastructure that helps protect critical data*
- Control of your cloud environment without complexity or hidden constraints*
- UK sovereign, government-aligned hosting*

# Network & Infrastructure

**Powering secure, resilient networks for the UK's most complex environments**

Our heritage in network and infrastructure supports our ability to help guide and deploy the right structure for UKPS organisations.

Modern organisations rely on resilient, high-performance networks to keep everything running, from data centres and cloud platforms to frontline operations and end users.

*We are leading providers of complex network architecture, deployment and management across the UK, specialising in environments where resilience, cyber-physical security and compliance are critical.*

*We provide end-to-end network services that support every stage of your infrastructure lifecycle:*

- *Network Architecture Consultancy*
- *Large Scale Network Deployment*
- *Advanced Network Monitoring & Assurance*
- *Hardware Supply & Configuration*
- *On-Site Support and Network Engineering*
- *24/7/365 Service Desk*

# Back-up

**Resilient, secure data protection designed to ensure business continuity and rapid recovery.**

We deliver modern backup and disaster recovery solutions that provide complete protection across cloud, on-premises, and hybrid environments, ensuring your data is always secure, recoverable, and available when you need it most.

Our approach focuses on eliminating risk, reducing downtime, and strengthening cyber resilience, so your organisation can operate with confidence, even in the face of disruption.

Powered by  
 **Assurestor**

## ***Always-On Protection for Rapid Recovery***

*Comprehensive, resilient data protection to ensure continuity and rapid recovery.*

- *Always-on protection with continuous data coverage*
- *Fast recovery to minimise downtime and disruption*
- *Protects all environments – cloud, on-prem, and hybrid*
- *Cyber-resilient by design with secure, immutable backups*
- *Safeguards against ransomware and data loss*
- *Fully managed, scalable services (BaaS & DRaaS)*
- *Simple deployment with minimal operational overhead*

*Reliable backup and recovery that keeps your organisation secure, resilient, and always operational.*

# Professional Services

**From Strategy to Support, we're with you Every Step of the Way**

We don't just deliver solutions, we build partnerships. Our approach is designed to guide you through every stage of your digital journey, from initial consultation to ongoing management. Whether you're deploying new infrastructure, migrating to the cloud, or enhancing security, we bring clarity, confidence, and control.

We follow best practices to ensure every project is aligned to your goals and delivered with precision from Consult, Design, Build, Deploy and Manage.

***Solution Architecture & Design:** Tailored, secure solutions aligned to business, performance, and scalability requirements*

***Expert Engineers:** Certified engineers delivering best-practice implementation across infrastructure and security*

***Project Management & Delivery:** Structured, end-to-end project execution ensuring on-time, on-budget outcomes*

***Hardware Procurement and Lifecycle Management:** From selection and sourcing to deployment, support, and refresh, ensuring cost efficiency, performance, and complete asset visibility throughout its lifecycle*

***Service Management & Support:** Proactive monitoring, support, and continuous improvement*

# Managed Services & Support

Our Managed Service options include round-the-clock support through a Network Operations Centre (NOC), ensuring continuous monitoring and rapid response.

Services include remote and/or on-site management covering IT, networks, Wi-Fi, and end-user support. The offering is fully managed, covering consultation, design, deployment, and on-going management.

- ✓ 24/7 Sovereign Network Operations Centre (NOC)
- ✓ On-Site & Remote IT, Network, Wi-Fi, and End-User Support
- ✓ Fully Managed Services to encompass consult, design, build, deploy and manage

# Built for Compliance and Security

## Delivering secure, compliant infrastructure

Trust meets the rigorous standards demanded to deliver infrastructure including that required by government and public sector organisations. Proven credentials including approval on the Crown Commercial Service **G-Cloud 14** Framework, ensuring trusted delivery and simplified procurement.

- ✓ ISO Certified: 14001, 27001, 9001, 20000-1
- ✓ Approved Crown Commercial Services Provider (G-Cloud 14 Framework)
- ✓ Business Continuity & Disaster Recovery aligned with ISO 22301
- ✓ Cyber Essentials Plus Certified

# The Power of the Trust Ecosystem

TRUST

# Why Trust?

20 years experience

80 in-house experts

Provider of whole lifecycle solutions  
Consult, design, deploy and manage.

IT Europa Channel Awards - **Winner:**  
Managed Services Solution of the year

Grant Thornton: Gloucestershire **Leading Company**

The Spectator Economic Innovator of the Year  
2024 - **Finalist:** South West & South Wales  
Region.
