

TRUST CLOUD

Redefining Cloud with Sovereignty, Simplicity, and Trust

In partnership with Zadara

Why Organisations are Rethinking Cloud

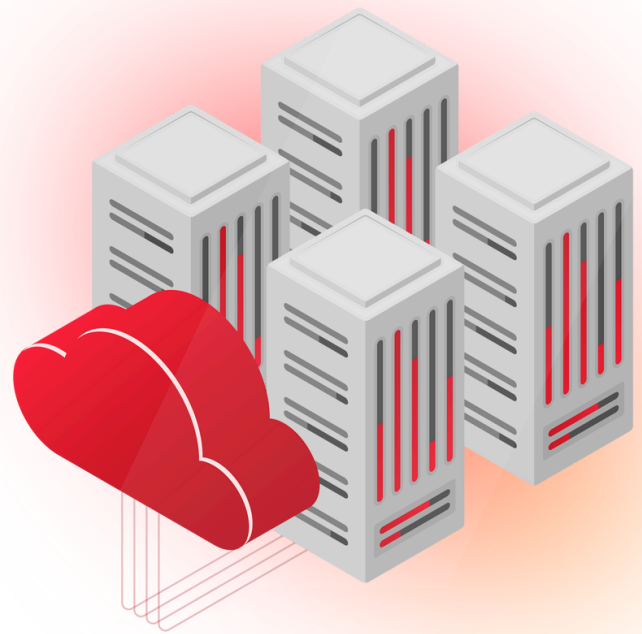

Modern organisations need infrastructure that is secure, stable, and future ready, without the complexity. Yet cloud strategies today are increasingly disrupted by instability, rising costs, vendor dependency, and legacy sprawl.

Trust Cloud Built to Solve these Challenges

We deliver a secure, sovereign, UK-hosted cloud platform that restores control, strengthens compliance, and provides predictable economics, giving you a cloud strategy you can trust long term.

A Cloud Built for Today's Reality

Trust Cloud is designed around the principles of data independence, sovereignty by design, and resilience without lock in. Whether you're simplifying your estate, navigating instability, or escaping single vendor dependency, we give you the clarity, control, and flexibility to modernise with confidence.

THE POWER OF THE TRUST CLOUD ECOSYSTEM

Powered by zadara

Enterprise grade compute and storage with built-in resilience and predictable OPEX pricing. Zadara enables true architectural freedom and scalability.

Hosted by **ARK**
DATA CENTRES

CROWN HOSTING
DATA CENTRES

Trusted, government grade UK facilities providing security, sustainability, and sovereign-by-design assurance. Ideal for regulated and public sector workloads.

Backed Up by Assurestor

Immutable, resilient backup and recovery to protect against data loss, corruption, or cyber threats.

Deployed & Managed by TRUST

We bring the full eco-system together, designing, deploying, managing, and optimising your cloud end to end.

→ You get a cloud environment that is monitored, managed, and fully supported by experts.

WHAT TRUST CLOUD DELIVERS

- ✓ Control without complexity → full visibility, governance, and transparency
- ✓ Confidence in design → open architecture and sovereign-by-design
- ✓ Predictable economics → simple commercial models with zero hidden charges
- ✓ Designed for maximum availability → at all levels
- ✓ Future-ready foundations → ideal for AI, automation, and long-term growth
- ✓ Strengthened compliance → fully UK hosted infrastructure for data sovereignty

Trust Cloud transforms unpredictable, dispersed environments into streamlined, resilient cloud platforms - so you can grow on your terms.

A PLATFORM ENGINEERED FOR CONTROL, COMPLIANCE, AND CONFIDENCE

Sovereign. Compliant. Built for Trust.

- UK hosted and sovereign by design
- Engineered for compliance
- Backed by Ark, Crown Hosting, and Assurestor
- Available via G-Cloud for government grade assurance

Cost Clarity. Zero Surprises.

- Transparent OPEX pricing – no egress fees or hidden costs
- Confidence and clarity of spend and consumption
- Flexible OPEX or CAPEX commercial models

Cloud Without the Headaches.

- Fully managed, monitored, and supported end-to-end
- Ideal for SMEs and teams with limited cloud resources
- Delivered as a complete managed service in any sector

Migrate Without the Risk.

- Low risk, seamless transitions from on prem or legacy systems
- Rapid deployment with optimised workload tuning from day one

Designed for Measurable Impact.

- Cuts Scope 2 emissions by up to 99.9%*
- Reduces power consumption by up to 75%*
- Aligns with UK Government Cloud First strategy
- Supports transformation across public and private sectors
- Security built in across infrastructure and cyber services

Proven, Certified, and Trusted.

Our cloud and hosting services are backed by independently verified standards, including:

- ISO accreditations
- Cyber Essentials & Cyber Essentials Plus
- G-Cloud Framework supplier status

This ensures your environment is operated to the highest levels of security, quality, and compliance.

*Based on Ark Datacentres / Crown Hosting
